use electricity generously at 1¹₂ cents per kilowatt hour

The new low rate, recently put into effect by the Alabama Utilities Company, is designed to enable the homemaker to make full use of electricity for domestic refrigeration, water heating and cooking, as well as for lighting and small appliances. The "quantity user" may take advantage of electric service in the home at a rate as low as 1 1-2 cents per kilowatt hour. Thoughtful homemakers will wish to investigate this opportunity. In order to assist our domestic customers in enjoying the cleanliness, safety, convenience and comfort which full use of electric service makes possible, we are offering two specials,—a range and an automatic water heater from the famous Hotpoint line,—on terms that make them easily available to the average family. In spite of the liberal terms offered, no installment carrying charge will be made to those purchasing during the month of March.

Nothing can take the place of hot water. It is needed continuously throughout the day and often at night. Washing dishes, scrubbing, cooking. Bathing, shaving and shampooing. Laundering clothing and linens. Keeping baby fresh, clean, comfortable. Sometimes in the eerie hours of the night when sickness descends without warning.

That's why the certainty of a constant supply of hot water—available instantly at any hour of the day or night—gives the owner of a Hotpoint Automatic Electric Water Heater such a feeling of satisfaction every time she turns the faucet. And that's all she ever has to do to get hot water-just turn the faucet! This modern electric servant has no switches to turn on or off-never requires the least bit of attention. It's fully automatic.

Your new low domestic electric rate brings the cost of electric water heating within the means of every average family. And during March you can purchase a Hotpoint Automatic Electric Water Heater at a price and on terms you can't afford to overlook.
